PRODUCT: A one-component, alkyd base, corrosion-inhibiting zinc chromate primer.

DESCRIPTION: TT-P-1757B Ty.I or Ty. II, Cl.C Zinc Chromate Primer is a single component, zinc-chromate pigmented, low-moisture sensitivity primer primarily intended for spray application on surface treated aluminum or surface treated with pre-treatment coatings MIL-C-8514C or DOD-P-15328D. This primer may be used with or without top coating. When suitable thinned, this primer may be used for dip or flow-coat application.

PROPERTIES:
- SOLIDS (Weight) ......................... 59% Minimum
- FINENESS OF GRIND ..................... 6 Minimum Zinc Chromate (Weight) ............... 85% Minimum of Pigment
- COLORS .................................. Green & Yellow

DRYING TIME:
- DRY HARD .................................. Within 15 Minutes
- THINNER ................................. MIL-T-81772B TY.III
- SHELF LIFE ............................... 1 Year

ADVANTAGES:
1. Corrosion Inhibiting
2. Use With or Without Topcoat
3. Fast Dry
4. Low-Moisture Sensitivity
5. Meets Government Specifications
**SURFACE PREPARATION:** Steel, Non-Ferrous Metals & Galvanizing.

Surface to be coated must be clean, dry, and free of all foreign contaminants including grease, oil, dirt and paint. Clean in accordance with SSPC-SP-1. Most metals should be sanded, except aluminum, which must have a base coat of pre-treatment wash primer MIL-C-8514C, followed by one wet coat of TT-P-1757B Ty.I or Ty. II, Cl.C  Alloys that oxidize must be lightly sanded to remove all loose material. Dirt and dust are best removed with a stiff bristle brush and by compressed air. For exterior use and non-ferrous metals, it is recommended that TT-P-1757B Ty.I or Ty. II, Cl.C be applied over pre-treatment coating conforming to MIL-C-8514C or DOD-P-15328D. Grease and oil should be removed by cleaning with appropriate solvents such as mineral spirits, lacquer wash thinner or xylene.

**MIXING/APPLICATION INSTRUCTIONS:**
Apply by spray, brush or dip to deposit a hiding coat of primer. A wet coat is necessary to secure maximum adhesion and corrosion inhibiting properties. For spraying, thin up to 15% by volume or as needed with thinner per TT-X-916 or MIL-T-81772B TY.III.

**PRECAUTIONS:**

KEEP OUT OF REACH OF CHILDREN.

USE WITH ADEQUATE VENTILATION.

AVOID CONTACT WITH SKIN AND EYES.

READ MATERIAL SAFETY DATA SHEET BEFORE USING.

CONTENTS ARE FLAMMABLE.
