

# TECHNICAL DATA SHEET

## TECHNICAL DATA SHEET LACQUER HARDENING AGENT

**PRODUCT:** A polyurethane cross linking additive that helps to improve hardness and cure Lacquers more rapidly. Lacquer hardening agent improves gloss, hardness, chemical resistance, and overall cure time of nitrocellulose lacquers.

### **DIRECTIONS:**

Mix eight (8) parts of lacquer to one (1) part lacquer hardening agent and mix well. Mix only what can be used in an 8 hour work day, as the material will continue to harden and cure in the pot.

### **PRECAUTIONS:**

KEEP OUT OF REACH OF CHILDREN.  
USE WITH ADEQUATE VENTILATION.  
AVOID CONTACT WITH SKIN AND EYES.  
READ MATERIAL SAFETY DATA SHEET BEFORE USING.  
CONTENTS ARE FLAMMABLE.
